Abstract: In today's ever changing world, information, technology and analytics continue to play an all-important role in every industry and among all employers for better product development, a better user experience and well-informed decision making. The need to have innovative employees and dynamic ideas provides businesses, government and organizations the competitive edge in creating new and better products/services, as well as novel developments that advance and change the world.

Bio: Peter Cavallo is a senior executive with over 35 years of experience driving high impact business solutions across the Global 2000. As both an industry practitioner and consultant, Peter has built and led domestic and international teams and has a referenceable track record for delivering complex consulting engagements, managing major accounts, and driving new business.
